(1) All requirements of this Ordinance; when provisions of this Ordinance create greater restrictions than paragraphs two (2) through nine (9) below, it is intended that the provisions of this Ordinance shall apply.

(4) Adams County Zoning Ordinance/Shoreland Protection Ordinance/Land Division Ordinance and Sanitary Ordinance;

(5) State of Wisconsin Department of Natural Resources rules on wetlands, shorelands, sewers and septic systems:

- (7) All applicable Town of New Haven ordinances, including the New Haven Driveway Ordinance;
- (8) State of Wisconsin Department of Transportation and/or Adams County Highway Department rules relating to safety of access and the preservation of the public interest and investment in the highway system, if the land owned and controlled by the land divider abuts on a state or county trunk highway or connecting road or street; and

13. EXEMPTIONS

(A) The provisions of this Ordinance, as it applies to land divisions of tracts of land into less than 5 parcels in the Town, shall not apply to any of the following:

- (1) Transfers in interest in land by will or pursuant to court order.
- (2) Leases for a term not to exceed 10 years, mortgages or easement.
- (3) The sale or exchange of parcels between owners of adjoining property if additional lots are not thereby created and the lots resulting are not reduced below the minimum sizes required by this ordinance or other applicable laws or ordinances.
- (4) The public acquisition of land for the widening of existing streets or for constructing other public works.

(B) All the following specific uses and activities are exempt from this Ordinance:

- (1) Cemetery plats made under 157.07 Wisc. Stats.
- (2) Assessors plats made under 70.27 Wisc. Stats.

14. RESTRICTIONS ON MAJOR LAND DIVISIONS AND TOWN SUBDIVISIONS

(A) The Town of New Haven finds that, in certain areas of the Town, "Major Land Divisions" and "Town Subdivisions" as defined in this Ordinance, do not promote the public health, safety and general welfare of the community, lessen congestion in the streets and highways, help to secure safety from fire, panic and other dangers, provide adequate light and air, prevent the overcrowding of land or avoid undue concentration of population.

(B) This finding was made with reasonable consideration, among other things, of the character of the Town of New Haven with a view of conserving the value of the buildings placed upon land, providing the best possible environment for human habitation, encouraging the most appropriate use of land throughout the town, preventing the fragmentation of productive agricultural and forestry lands, and of the Town's goal to keep taxes as low as possible.

(C) The Town of New Haven also finds that:

The Town's "**Agricultural Areas**", as mapped on the New Haven Comprehensive Plan "**Future Land Use Plan**" map, contain primarily Class I and Class II prime agricultural soils as defined by the NRCS Soil Capability Classification System, and

The Town's "**Forestry Areas**", as mapped on the New Haven Comprehensive Plan "**Future Land Use Plan**" map, contain primarily contiguous woodlands that provide timber, recreational activities, scenic beauty, wildlife habitat and protection of sensitive environmental areas where tree cover is essential, especially for erosion control and to reduce effluent and nutrient flows into surface waters, and

The Town's "**Preservation and Open Space Areas**", as mapped on the New Haven Comprehensive Plan "**Future Land Use Plan**" map, contain primarily sensitive environmental areas, including FEMA 100 year flood plains, DNR wetlands and shoreland protection areas,

And that preservation of these lands by limiting the fragmentation of parcels will benefit the general welfare of the community,

(F) Therefore all Land Divisions in the "Agricultural Areas", "Forestry Areas", and "Preservation and Open Space Areas" designated on the New Haven Comprehensive Plan "**Future Land Use Plan**" map shall be limited to "Minor Land Divisions" and both "Major Land Divisions" and "Town Subdivisions" shall be prohibited in these areas of the Town, **unless the proposed Major Land Division or Town Subdivision results in one (1) or less "net total lots", as defined in this ordinance.**

(G) Tracking of land divisions for purposes of determining whether the land division is considered a "Major Land Division", a "Minor Land Division" or a "Town Subdivision" shall be coordinated between the New Haven Plan Commission and Town Clerk, beginning on the effective date of this ordinance. The base from which the tracking will occur will be all parcels in the Town of New Haven that are legally recorded in Adams County as of the effective date of this ordinance, based on a list provided from the Adams County Real Property Lister. The Land Divider may be required to include language on the instruments of conveyance noting the number of future divisions allowable within the next 5 years.

15. CONDOMINIUMS

(A) Pursuant to sec. 703.27, Wis. Stats., this Ordinance shall be applicable to condominiums. It is hereby declared and determined that each provision of this Ordinance reasonably relates to the nature of all forms of

ownership, including condominium ownership. For purposes of this Ordinance, a condominium unit and any associated limited common elements shall be deemed to be equivalent to a lot or parcel created by the act of land division.

(B) Adequate open space shall be provided so that the average density and intensity of land use shall be no greater than that permitted by this ordinance and/or the Adams County Zoning Ordinance, whichever is more restrictive.

16. LAND SUITABILITY

(A) Natural and Preexisting Divisions. No land will be divided solely because the parcel is bisected or divided by a road, railroad, right of way, stream or other natural feature on the land, all other conditions of approval under this Ordinance must also be met. It is recommended that such bisected or naturally divided parcels that will be proposed for land division under this Ordinance shall be divided along these natural or constructed features.

(B) Material Interference with Goals of Land Use Plan. No land shall be divided if it is determined that the land division will materially interfere with existing land uses or will conflict with other goals, objectives and policies as set forth in the Town of New Haven Comprehensive Plan.

(C) Threat to Groundwater. No land shall be divided for a purpose that poses a substantial threat to the quality or quantity of Town groundwater.

(D) Unsuitable Conditions. No land shall be divided which is held unsuitable for its proposed use for reason of flooding, inadequate drainage, dangerous or hazardous land conditions, adverse soil or rock formation, severe erosion potential, unfavorable topography, inadequate water supply or sewage disposal or maintenance capabilities, adverse impairment of wildlife habitat and scenic vistas, improper utilization of productive farm soils, undue costs and inefficiencies in the provision of governmental services, or any other feature likely to be harmful to the health, safety or welfare of future residents of the Town. The Plan Commission may require the land divider to furnish maps, data and other information as may be necessary to determine land suitability.

(E) Design and Evaluation Criteria. Diversity in lot layout shall be encouraged to achieve the best possible relationship between development and conservation areas. Accordingly, the Town shall evaluate proposals to determine whether the proposed development:

- (1) Protects and preserves all floodplains, wetlands, and steep slopes from clearing, grading, filling, or construction (except as may be approved by the town for active or passive recreation amenities).
- (2) Preserves and maintains mature woodlands, existing fields, meadows, and significant wildlife habitat, and creates sufficient buffer areas to minimize conflicts between residential and agricultural uses to the fullest extent that is practicable.
- (3) Maintains or creates an upland buffer of native species vegetation of at least 100 feet adjacent to wetlands and surface waters, including creeks, streams, springs, lakes and ponds.
- (4) Protects wildlife habitat areas of species listed as endangered, threatened, or of special concern by U.S. Fish & Wildlife Service and/or by the Wisconsin Dep't of Natural Resources.
- (5) Preserves sites of historic, archaeological, or cultural value, and their environs, insofar as needed to safeguard the character of the feature. This includes, among other sites, all known or marked graves,

Native American or other, and all Native American mounds.

17. LOT DESIGN STANDARDS

(A) Minimum Lot Size. Upon the effective date of this Ordinance, for all lands in the Town not served by public sewer in which the minimum lot size is less than two (2) acres under County Zoning, the minimum lot size shall thereafter be two (2) acres. An exception may be granted for strictly nonresidential uses such as utilities or other infrastructure, where a Private On-site Waste Treatment System (POWTS) would never be required.

(B) Depth/Width Ratio. The depth of a lot shall not exceed four (4) times its width at its widest point.

(C) Minimum Lot Width. Providing a lot's width is sufficient to meet the 4 to 1 Depth/Width Ratio requirement in this ordinance, a lot created by land division shall have a minimum lot width as required by the Adams County Zoning Ordinance. When the Adams County Zoning minimum lot width requirement is not sufficient to meet the Depth/Width Ratio requirement in this ordinance, a lot created by land division shall have a minimum lot width which will meet the Depth/Width Ratio requirement.

(D) Access. Each parcel of land created must abut a public road or street by at least **thirty three (33)** feet.

(E) Flag Lots, Driveway Access Separation. Each parcel of land created must allow for a driveway access or easement location which is a minimum of seventy five (75) feet from any existing driveway access or easement location on the same road. *Driveway access separation requirements may be even greater under the Adams County Driveway Access Policy Ordinance for County Highways or under Wisconsin DOT access regulations for State Highways.*

18. ROAD DESIGN STANDARDS

(A) The land divider shall dedicate land for and improve streets and roads at land divider's expense, to provide access to any proposed new lots in the Town of New Haven, if a new public road has been approved by the Town Board. Public roads shall conform to Town road widths and standards in 82.50 Wis. Stats, or to Adams County road standards if applicable, and shall intersect at right angles where practicable to afford maximum visibility and safety.

(B) The number of intersections of minor public streets or public roads shall be reduced to the practical minimum consistent with circulation needs and safety requirements. Where a land division abuts or contains an existing or proposed arterial highway, the Town Board may require a frontage road, non-access reservation contiguous to such highway, or such other treatment as may be necessary to insure safe, efficient, traffic flow and adequate protection of residential properties.

(C) The Town Board may require a performance bond or letter of credit to insure the construction of roads to the appropriate standards. The Town may also require a Developer's Agreement, to ensure the proper development of any dedicated areas.

(D) The subdivider may construct the project in such phases as the town board approves, which approval may not be unreasonably withheld, If the subdivider's project will be constructed in phases, the amount of any surety bond or other security required by the town board shall be limited to the phase of the project that is currently

being constructed. The town board may not require that the subdivider provide any security for improvements sooner than is reasonably necessary before the commencement of the installation of the improvements.

19. EASEMENTS

(A) The Town Board for any land division may require rear or side outlot, parcel, or lot line utility easements at locations and of widths deemed adequate by the Town Board.

(B) The Town Board may require that easements or drainageways of widths sufficient to accommodate storm water run-off be provided where a land division area includes a segment or segments of water courses, drainageways, channels, or streams.

20. PRELIMINARY CONSULTATION

It is recommended that, prior to filing an application and fee for land division approval, the land divider shall schedule an informal preliminary consultation with the Town Plan Commission Chair. This consultation is not mandatory, but is intended to inform the land divider of the purpose and objectives of this Ordinance, the Comprehensive Plan, and other duly adopted plan implementation devices of the Town. In so doing, both the land divider and the Plan Commission may reach mutual conclusions regarding the general objectives of the proposed land division and its possible effects on the neighborhood and community, before the expense of a certified survey map or plat is incurred. Any conclusions reached are not to be considered official preliminary approvals or disapprovals of the proposed land division.

Recommended information to be provided includes: The name, address and phone number of the land divider, the location of the property, the number and size of projected parcels and an estimated timetable for any development. Also recommended is a sketch map that includes parcel numbers, a reference to a section corner, the approximate dimensions and areas of the parcels, the location and type of existing and proposed buildings and structures, the location of drainage ditches, water wells, sewerage systems, drain fields, drain tiles and other features pertinent to the land division, the location of existing and proposed roads and driveways, distances to the nearest adjoining highways, roads, or driveways on all sides of the proposed site, location of general land cover types, such as woods, wetlands, agricultural, etc., location of any slopes of 12% or greater and location of any required building setback lines.

24. VARIANCES

Where, in the judgment of the Plan Commission, it would be inappropriate to apply literally the provisions of this Ordinance because exceptional or undue hardship would result, the Plan Commission may recommend that the Town Board waive or modify any requirement to the extent deemed just and proper. Such relief shall be granted without detriment to the public good, without impairing the intent and purpose of this Ordinance or the desirable general development of the community in accordance with an adopted comprehensive plan or component thereof. No exception or modification shall be recommended unless the Plan Commission finds that all the following facts and conditions exist:

(A) Exceptional Circumstances: There are exceptional, extraordinary, or unusual circumstances or conditions where a literal enforcement of the requirements of this Ordinance would result in severe hardship. Such hardships should not apply generally to other properties or be of such a recurrent nature as to suggest that this Ordinance should be changed.

(B) Preservation of Property Rights: That such exception or modification is necessary for the preservation and enjoyment of substantial property rights possessed by other properties in the same vicinity.

(C) Absence of Detriment. That the exception or modification will not create substantial detriment to adjacent property and will not materially impair or be contrary to the purpose and spirit of this Ordinance, the comprehensive plan or the public interest.

(D) A Majority Vote of the full membership of the Plan Commission shall be required to recommend to the Town Board any variance to this Ordinance. A majority vote of the Town Board shall be required to approve, or approve with changes, any variance to this ordinance.
